

Wirewound Resistors,

TYPE: KNP Series

TYPE: KNZ Series

TYPE: KNPN Series Non-inductive

Power Rating: 1/2W-30W

Resistance Value: 0.01 Ω -100K Ω

Resistance Tolerance: $\pm 0.1\%$, $\pm 0.5\%$, $\pm 1\%$, $\pm 5\%$, $\pm 10\%$

● Construction:

1. Leads are welded to the end caps. Plated caps (with leads) are force-fitted before the assembly is trimmed using advanced equipment to ensure excellent performance and low electrical noise.
2. Winding resistance wires around non-alkaline heat-resistance ceramic core which is added with an outer layer of heat and humidity resistance and non-corrosive protective material, and a coating of silicon resin paint.
3. For high resistance value, wires are replaced by metal oxide films.

● Features:

1. Gray, green, and black are available. KNP and KNPN 1/2W-5W, marks are ring; KNP and KNPN 5W-30W and KNZ, marks are letters.
2. Standard type & non-inductive type available; marks are ring or letter available.
3. Low noise, resistance to high temperature, low temperature, coefficient, high overload power, surface nonflammable.
4. For non-standard technical requirements and custom special applications, please contact us to discuss the details.
5. Delivery: 5-7 days
6. Conforms to the ROHS standard and the LEAD-FREE non-lead standard.

● Applications:

Widely used in circuit. Ballast, Power tools, Consumer applications, Power supplies, Welders, High voltage applications, Home entertainment, appliances.

1.We can do the resistors following customer special requirement.

2.For high resistance value,wires are replaced by metal oxide films.
